An International Review of Spectroscopy and Astronomical Physics

EDITORS

GEORGE E. HALE
*Director of the Yerkes Observatory*

JAMES E. KEELER†
*Director of the Lick Observatory*

ASSISTANT EDITORS

J. S. AMES
*Johns Hopkins University*

W. W. CAMPBELL
*Lick Observatory*

HENRY CREW
*Northwestern University*

E. B. FROST
*Yerkes Observatory*

ERNEST F. NICHOLS
*Dartmouth College*

F. L. O. WADSWORTH
*Allegheny Observatory*

ASSOCIATE EDITORS

M. A. CORNU
*École Polytechnique, Paris*

N. C. DUNÉR
*Astronomiska Observatorium, Upsala*

WILLIAM HUGGINS
*Tulse Hill Observatory, London*

P. TACCHINI
*Osservatorio del Collegio Romano, Rome*

H. C. VOGEL
*Astrophysikalisches Observatorium, Potsdam*

C. S. HASTINGS
*Yale University*

A. A. MICHELSON
*University of Chicago*

E. C. PICKERING
*Harvard College Observatory*

H. A. ROWLAND
*Johns Hopkins University*

C. A. YOUNG
*Princeton University*

† Deceased.

## VOLUME XII

## JUNE—DECEMBER, 1900

# CONTENTS

## NUMBER I.

PAGE

On the Spectrum of Radium. C. Runge - - - - - - 1

The Velocity of Meteors as Deduced from Photographs at the Yale Observatory. W. L. Elkin - - - - 4

Some New Fluorescence and Afterglow Phenomena in Vacuum Tubes Containing Nitrogen. Percival Lewis - - - 8

The Effect of Some Impurities on the Spectra of Some Gases. II. Percival Lewis - - - - - - - - - 16

Prominences Observed at Kalocsa on May 28, 1900. J. Fényi 24

A Suggested Explanation of the Solar Corona. J. Scheiner - 25

Remarks on the Construction and Adjustment of Spectrographs. II. J. Hartmann - - - - - - - - - 30

Note on the Spectrum of Silicon. Franz Exner and Eduard Haschek - - - - - - - - - - - - - 48

Pressure in the Spark. Eduard Haschek and Heinrich Mache - 50

James Edward Keeler. George E. Hale - - - - - - 102

Minor Contributions and Notes: A New Star in *Aquila*, E. C. Pickering, 52; The Yerkes Observatory of the University of Chicago, *Bulletin* No. 13, George E. Hale, 52; Positions of *Eros* (433) in 1893, 1894, and 1896, Edward C. Pickering, 55.

Eclipse Reports: Preliminary Results of the United States Naval Observatory Eclipse Expeditions, S. J. Brown, 58; A Preliminary Statement of the Results of the Smithsonian Observatory Eclipse Expedition, C. G. Abbot, 69; Eclipse Observations by the Princeton Party at Wadesboro, N. C., May 28, 1900, C. A. Young, 77; The Yerkes Observatory of the University of Chicago, *Bulletin* No. 14, Observations of the Total Solar Eclipse of May 28, 1900, at Wadesboro, N. C., George E. Hale, 80; Observations of the Total Eclipse at Centerville, Norfolk County, Va., Winslow Upton, 89; Observations at Juliette, Ga., C. W. Crockett, 92; Observations of the Total Solar Eclipse of May 28, 1900, by the Harvard Observatory Expedition, William H. Pickering, 94; Observations of the Total Eclipse by the Vassar College Party, Mary W. Whitney, 96; Observations by the

PAGE

Massachusetts Institute of Technology Party, Alfred E. Burton, 96; Observations at Wadesboro, N. C., J. B. Coit, 97; Observations at Southern Pines, N. C., F. E. Seagrave, 98; The Weather Bureau Observations of the Total Eclipse of May 28, 1900, 99; Observations at Norfolk, Va., Frank W. Very, 100; Observation by the Georgetown College Party, J. G. Hagen, 101; Persistence of the Corona after Totality, John Fred Mohler, 102.

NUMBER II.

THE SPECTRA OF MERCURY. William B. Huff - - - - - 103

AN INVESTIGATION ON THE ZEEMAN EFFECT. Herbert M. Reese - 120

A NEW THEORY OF THE MILKY WAY. C. Easton - - - - 136

MINOR CONTRIBUTIONS AND NOTES: Variable Stars in Clusters. Rate of Increase of Light, Edward C. Pickering, 159; The Yerkes Observatory of the University of Chicago, *Bulletin* No. 15, George E. Hale, 161; Comparison of a Prism and a Grating Spectroscope, N. Ernest Dorsey, 164.

NUMBER III.

ON THE ARC-SPECTRA OF SOME METALS AS INFLUENCED BY AN ATMOSPHERE OF HYDROGEN. Henry Crew - - - - - 167

SOME ABNORMAL STARS IN THE CLUSTER *M 13 Herculis*. E. E. Barnard - - - - - - - - - - - - - 176

DISCOVERY AND PERIOD OF A SMALL VARIABLE STAR IN THE CLUSTER *M 13 Herculis*. E. E. Barnard - - - - - 182

SOLAR PHENOMENA, CONSIDERED IN CONNECTION WITH ANOMALOUS DISPERSION OF LIGHT. W. H. Julius - - - - - - 185

NOTE ON INQUIRIES AS TO THE ESCAPE OF GASES FROM ATMOSPHERES. G. Johnstone Stoney - - - - - - - 201

THE COMPLETE EMISSION FUNCTION. P. G. Nutting - - - 208

RISE OF A LARGE PROMINENCE ON JUNE 1, 1900. J. Fényi - - 215

FIELD OF THE REFLECTING TELESCOPE. S. C. Reese - - - - 219

REVIEWS: A General Catalogue of 1290 Double Stars discovered from 1871 to 1899 by S. W. Burnham, S. W. Burnham (E. E. Barnard), 228; Photometric Revision of the Harvard Photometry during the Years 1891–1894, Edward C. Pickering (J. A. P.) 236

NUMBER IV.

PAGE

JAMES EDWARD KEELER. W. W. Campbell - - - - - - 239

A LIST OF NINE STARS WHOSE VELOCITIES IN THE LINE OF SIGHT ARE VARIABLE. W. W. Campbell and W. H. Wright - - 254

THE VISIBLE SPECTRUM OF *Nova Aquilae*. W. W. Campbell - 258

THE VARIABLE STAR *7792 SS Cygni*. J. A. Parkhurst and Zaccheus Daniel - - - - - - - - - - - - - - - 259

THE AUXILIARY APPARATUS OF THE MILLS SPECTROGRAPH FOR PHOTOGRAPHING THE COMPARISON SPECTRUM. W. H. Wright 274

"A SUGGESTED EXPLANATION OF THE SOLAR CORONA." Sir William Huggins - - - - - - - - - - - - - - 279

THE PROBLEM OF THE DAYLIGHT OBSERVATION OF THE CORONA. R. W. Wood - - - - - - - - - - - - 281

OBSERVATIONS OF THE TOTAL SOLAR ECLIPSE OF MAY 28, 1900, AT ARGAMASILLA, SPAIN. H. Deslandres - - - - - - 287

REVIEWS: An Atlas of Representative Stellar Spectra, Sir William and Lady Huggins (G. E. H.), 291; Publicationen des Astrophysikalischen Observatoriums zu Potsdam: Photographische Himmelskarte, Band I. (E. B. F.), 297; Strahlung und Temperatur der Sonne, J. Scheiner (E. B. F.), 303; Observations of Variable Stars by Argelander, Schönfeld, and Schmidt. Annals of the Astronomical Observatory of Harvard College, Vol. XXXIII (J. A. P.), 305.

---

NUMBER V.

SPECTROSCOPIC RESULTS OBTAINED AT THE SOLAR ECLIPSE OF MAY 28, 1900. Edwin B. Frost - - - - - - - - 307

CELESTIAL PHOTOGRAPHY WITH THE 40-INCH VISUAL TELESCOPE OF THE YERKES OBSERVATORY. G. W. Ritchey - - - 352

THE REVERSING LAYER PHOTOGRAPHED WITH A CONCAVE ROWLAND GRATING. J. F. Mohler and F. C. Daniel - - - 361

FIRST RESULTS OF INVESTIGATIONS ON THE OBSERVATION OF THE SOLAR CORONA WITHOUT AN ECLIPSE BY MEANS OF THE HEAT RAYS. H. Deslandres - - - - - - - - 366

THE HEAT RADIATION OF THE CORONA. S. P. Langley - - 370

ON SOME ATTEMPTS TO DETECT THE SOLAR CORONA IN FULL SUNLIGHT WITH A BOLOMETER. George E. Hale - - - 372

REMARKS ON MR. EASTON'S ARTICLE "ON A NEW THEORY OF THE MILKY WAY" IN THE *ASTROPHYSICAL JOURNAL* VOL. XII, P. 136. H. Seeliger - - - - - - - - - 376

MINOR CONTRIBUTIONS AND NOTES: Appointment of Professor W. W. Campbell as Director of the Lick Observatory, G. E. H. 381
